Article 8 Open Access Publishing (Hybrid)

- 8.1 Publisher will publish in Open Access any article submitted by an Eligible Corresponding Author and accepted by Publisher for publication, for Hybrid Journals specified in [Schedule C-c](#), at no direct costs to the author or the Institution. Eligibility is based on the moment of the article entering Publisher's production system (post acceptance).
- 8.2 During the submission of the Eligible Article (Hybrid), the submitting author is responsible for correctly identifying the institutional affiliation of all authors, to identify the corresponding author and to provide institutional email addresses. When entering an institutional affiliation Publisher provides the author with suggested matches and the author will select the appropriate match.

Publisher will use this match to identify an Eligible Corresponding Author as affiliated to the Licensee using Ringgold ID matches. The Licensee is responsible for providing and updating the list of applicable Ringgold IDs for Publisher to use in matching.

In the event of no match being found (including when Licensee itself did not provide applicable Ringgold IDs), Publisher will attempt to identify an Eligible Corresponding Author using the corresponding author's email address domain. The Licensee is responsible for providing and updating the list of applicable email domains for Publisher to use in matching.

- 8.3 If the Eligible Corresponding Author was not identified as eligible due to incomplete, inaccurate or conflicting affiliation data provided by the submitting author, Publisher will not be required to convert the article to open access at a later date, but may offer to do so at Publisher's sole discretion.
- 8.4 If the Eligible Corresponding Author was not identified as eligible due to Publisher's failure and then Publisher publishes the article under a traditional subscription only format, Publisher shall be responsible to convert the article promptly so that it is published open access.
- 8.5 Institutions may opt to use a pre-approval workflow to review all eligible articles before the offer of Hybrid Open Access is made to the authors. Institutions opting for this workflow will be notified by email of an eligible article being identified and will have 5 days to review the article and approve or reject the eligibility of the article. Articles approved will then be communicated to the authors as detailed in 8.6 (below). Articles rejected by the institution will no longer be considered Eligible Articles and the author will not be offered Open Access publication under this agreement.
- 8.6 The Publisher will clearly indicate the availability of this Agreement to identified Eligible Corresponding Authors both as the Eligible Article enters Publisher's production system (post acceptance) and on its website. This will make clear that Eligible Authors do not need to pay Article Processing Charges ("APC") for Open Access Articles published in Hybrid Journals.
- 8.7 The Publisher will clearly indicate to authors that Open Access publishing is the preferred / required option under this agreement, with text to be agreed between SURFMarket and the Publisher
- 8.8 Transacting author (who can be any of the article authors, including the Eligible Corresponding Author) enters Publisher's open access portal and confirms acceptance of open access publishing for the Eligible Article (Hybrid).

- 8.9 Transacting author confirms their identity and the copyright ownership status of the Eligible Article (Hybrid).
- 8.10 Transacting author will only be offered a Creative Commons licence Attribution 4.0 International (CC BY or CC-BY-NC). Publisher's open access portal will provide explanatory text explaining author why the CC BY licence is displayed. Author may contact Publisher open access customer service if another licence is required.
- 8.11 Transacting author digitally signs the open access publishing agreement. Under such agreement, Eligible Corresponding Authors retain their copyrights. Eligible Corresponding Authors only grant Publisher the non-exclusive right to publish Eligible Articles (Hybrid) under the terms and conditions of the applicable CC licence.
- 8.12 If the Transacting author rejects open access publishing of the Eligible Article (Hybrid), the Eligible Article (Hybrid) will be published in a traditional subscription only format, not as open access.
- 8.13 If a transacting author does not respond to Publisher offer of open access publishing, a reminder will be sent by Publisher to all authors after 7 days.
- 8.14 If the transacting author does not digitally sign the open access publishing agreement (e – above) within 14 days, the Eligible Article (Hybrid) will be published in a traditional subscription only format, not as open access.
- 8.15 Eligible Corresponding Authors who have rejected open access publishing of their Eligible Article (Hybrid) or who have not signed the open access publishing agreement after 14 days may contact Publisher's open access customer service team to request the offer be resent at any time before article proofs have been issued. Once article proofs have been issued, and except if Publisher did not correctly identify the author as eligible, the Eligible Corresponding Author may request conversion to open access from Publisher's open access customer service team. Publisher shall convert the Eligible Article (Hybrid) to open access, and may charge (at the Publisher's sole discretion) a fee of £400 by the transacting author or their nominated bill-payer and upon the transacting author signing the open access publishing agreement.
- 8.16 Institutions who have opted for the pre-approve workflow will be able to monitor author acceptance or rejection of the Open Access publishing option via the reporting available on the platform. If required the institution is free to contact the author to prompt them to accept the Open Access publishing agreement if the 14 day deadline approaches and pre-emptively avoid an author requesting retrospective conversion at the £400 rate following the production of article proofs as detailed in 8.15 above.
- 8.17 Hybrid Journals that are being changed to Full Open Access journals in the course of this Agreement will continue to be available for Open Access publishing for the duration of this Agreement.
- 8.18 If after submission of an article the eligibility of that article changes, Publisher will immediately inform the Submitting Author.
- 8.19 For journals running in the standard production workflow, Publisher shall incorporate tags in meta-data to indicate if an article has been published in Open Access

Article 9. Open Access Publishing (Gold)

- 9.1. Publisher will grant a discount of 20% of the list Article Processing Charge (APC) to any article submitted by an identified Eligible Corresponding Author and accepted by Publisher for publication, for Gold OA Journals specified in [Schedule C-d](#). For the avoidance of doubt, this discount may not be combined with any other available discount. If other discounts are available to the Eligible Article, the highest single discount will be applied.
- 9.2. Eligible Corresponding Author must self-identify by quoting "UKB2020" in the discount code field on the RightsLink author portal. For Gold Open Access Journals where RightsLink portal is not used, Eligible Corresponding Author must contact apcqueries@sagepub.co.uk to request the discount.
- 9.3. Publisher verifies author is an Eligible Corresponding Author and issues an invoice for the current list rate article processing charge, inclusive of the agreed 20% discount. If a higher discount is available to the Author, the higher discount will be applied instead.
- 9.4. Publisher is developing an automated portal that will simplify processes and allow proactive identification of Eligible Corresponding Authors. Once available (at the latest during 2020), Publisher will offer this functionality to Licensee at no extra cost. Identification and workflow will be as described above in sections 8.2-8.4
- 9.5. Once the automated portal is available (at the latest during 2020) the transacting author will only be offered the Creative Commons licence Attribution 4.0 International (CC BY) where the journal accepts that license. Publisher's open access portal will provide explanatory text explaining author why the CC BY licence is displayed. Author may contact Publisher open access customer service if another licence is required.
- 9.6. Publisher publishes Eligible Article (Gold) as open access upon payment of the article processing charge by the Eligible Corresponding Author or their nominated bill-payer.
- 9.7. Once Publisher has finalized an automated portal that will simplify processes (at the latest during 2020), Licensee may select to pay the article processing charges for publication of Eligible Article (Gold) on behalf of the Eligible Corresponding Authors. In such case, Licensee will choose between payment against monthly aggregated billing, payment of individual articles and prepayment of an amount (to be determined by Licensee only) covering article processing charges for publication of Eligible Article (Gold).
- 9.8. If Eligible Corresponding Author does not request the discount via the code, they may request an amended invoice by contacting Publisher open access customer service team prior to payment being made.
- 9.9. Once paid, Publisher is unable to refund or part refund an article processing charge where the discount has not been requested, except, due to Publisher's failure.

Until this service is available, Publisher will provide manual reporting on a quarterly basis. These manual reports will cover all published articles, hybrid, identified to the Licensee as described in section 8 above and gold articles where a discount code has been provided.

Taking account of the state of technology and the cost of implementing them, these measures shall provide an appropriate level of security in view of the risks associated with such processing and the nature of the data being protected.
- 11.2 Publisher shall immediately notify the Institution regarding any security-related incidents and their potential impact on the processing of Personal Data.
